### Activity Summary

**Initials** | **Date** | **Comments**
---|---|---
PS | 2012 | Initial Release
EJ | 3/2020 | Added 9205+, modified Do Not Use statement re: sandblasting similar to recent DR UIs
Particulate Respirator N95

User Instructions

IMPORTANT: Keep User Instructions for reference

*37192 and 37193 are catalog numbers only. NIOSH approved as 3M™ Particulate Respirator N95 9210+ and 3M™ Particulate Respirator N95 9211+. See insert for approval label.

98-0060-0208-7_2
This respirator helps protect against certain particles. **Misuse may result in sickness or death.** For correct use, consult supervisor and or **User Instructions**, or call 3M in U.S.A., 1-800-243-4630. In Canada, call Technical Service at 1-800-267-4414.

**IMPORTANT**
Before use, wearer must read and understand these **User Instructions**. Keep **User Instructions** for reference.

**Use For**
Particles such as those from grinding, sanding, sweeping, sawing, bagging, or processing minerals, coal, iron ore, flour, metal, wood, pollen, and certain other substances. Liquid or non-oil based particles from sprays that do not also emit oil aerosols or vapors. Follow all applicable local regulations. In the U.S, for additional information on 3M use recommendations for this class of respirator please consult the 3M Respirator Selection Guide found on the 3M PSD web site at www.3M.com/PPESafety or call 1-800-243-4630. In Canada call 1-800-267-4414.

**Do Not Use For**
Do not use for gases and vapors, oil aerosols, or sandblasting, unless nozzle and blast are physically separated from the operator in an exhaust-ventilated enclosure; particulate concentrations that exceed either 10 times the occupational exposure limit or applicable government regulations, whichever is lower. This respirator does not supply oxygen. In the U.S., do not use when OSHA substance specific standards, such as those for asbestos, arsenic, cadmium, lead in the construction industry, or 4,4'-methylene dianiline (MDA), specify other types of respiratory protection.

**Biological Particles**
This respirator can help reduce inhalation exposures to certain airborne biological particles (e.g. viruses, mold, Bacillus anthracis, Mycobacterium tuberculosis, etc.) but cannot eliminate the risk of contracting infection, illness or disease. OSHA and other government agencies have not established safe exposure limits for these contaminants.

**Use Instructions**
1. Failure to follow all instructions and limitations on the use of this respirator and/or failure to wear this respirator during all times of exposure can reduce respirator effectiveness and may **result in sickness or death**.
2. Before occupational use of this respirator, in the U.S. a written respiratory protection program must be implemented meeting all the requirements of OSHA 29 CFR 1910.134 such as training, fit testing, medical evaluation, and applicable OSHA substance specific standards. In Canada, CSA standard Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate.
3. The particles which can be dangerous to your health include those so small that you cannot see them.
4. Leave the contaminated area immediately and contact supervisor if dizziness, irritation, or other distress occurs.
5. Store the respirator away from contaminated areas when not in use.
6. Inspect respirator before each use to ensure that it is in good operating condition. Examine all the respirator parts for signs of damage including the two headbands, staples, noseclip, and nosefoam. The respirator should be disposed of immediately upon observation of damaged or missing parts. Filtering facepieces are to be inspected prior to each use to assure there are no holes in the breathing zone other
than the punctures around staples and no damage has occurred. Enlarged holes resulting from ripped or torn filter material around staple punctures are considered damage. Immediately replace respirator if damaged. Staple perforations do not affect NIOSH approval.

7. Dispose of used product in accordance with applicable regulations.

Use Limitations
1. This respirator does not supply oxygen. Do not use in atmospheres containing less than 19.5% oxygen.
2. Do not use when concentrations of contaminants are immediately dangerous to life or health, are unknown or when concentrations exceed 10 times the permissible exposure limit (PEL) or according to specific OSHA standards or applicable government regulations, whichever is lower.
3. Do not alter, abuse, wash or misuse this respirator.
4. Do not use with beards or other facial hair or other conditions that prevent a good seal between the face and the sealing surface of the respirator.
5. Respirators can help protect your lungs against certain airborne contaminants; however, they will not prevent entry through other routes such as the skin, which would require additional personal protective equipment (PPE).
6. This respirator is designed for occupational/professional use by adults who are properly trained in their use and limitations. This respirator is not designed to be used by children.
7. Individuals with a compromised respiratory system, such as asthma or emphysema, should consult a physician and complete a medical evaluation prior to use.
8. When stored in accordance with temperature and humidity conditions specified below, the product may be used until the “use by” state specified on packaging.

Storage Conditions and Shelf Life
Before use, store respirators in the original packaging, away from contaminated areas, dust, sunlight, extreme temperatures, excessive moisture and damaging chemicals. When stored in accordance with temperature and humidity conditions specified below, the product may be used until the “use by” date specified on packaging. Always inspect product and conduct a user seal check before use as specified in User Instructions. If you cannot achieve a proper seal, do not use the respirator.

End of Shelf Life Use respirators before the “use by” date specified on packaging

Storage Temperature Range -20°C (-4°F) to +30°C (+86°F).

Storage Maximum Relative Humidity <80% RH

Time Use Limitations
If respirator becomes damaged, soiled, or breathing becomes difficult, leave the contaminated area immediately and replace the respirator.

**Fitting Instructions:**
Must be followed each time respirator is worn.
1. Remove respirator from packaging and hold with straps facing upward (1a). Place bottom strap under center flaps next to WARNING statement as shown (1b).

2. Fully open top and bottom panels, bending nosepiece around thumb at center of foam. Straps should separate when panels are opened. Make certain bottom panel is unfolded and completely opened.

3. Place respirator on your face so that the foam rests on your nose and the bottom panel is open under chin. Hold the bottom panel securely under your chin. Pull the top strap over your head and position it high on the back of the head (3a). Then pull the bottom strap over your head and position it around the neck and below the ears (3b). Adjust for a comfortable fit by pulling top panel toward the bridge of the nose and bottom panel under chin.

4. Place your fingertips from both hands at the top of the metal nosepiece. Using two hands, mold the nose area to the shape of your nose by pushing inward while moving your fingertips down both sides of the nosepiece.

！Pinching the nosepiece using one hand may result in improper fit and less effective respirator performance. Use two hands.

5. Perform a User Seal Check prior to each wearing. To check the respirator-to-face seal, cover the middle panel with one or both hands. For the 9205+ and 9210+ respirator, inhale and exhale sharply. For the 9211+ respirator, inhale sharply. Be careful not to disturb the position of the respirator. If air leaks around the nose, readjust the nosepiece as described in step 4. If air leaks around respirator edges, adjust panels and straps. If you CANNOT achieve a proper fit, DO NOT enter the contaminated area. See your supervisor.

Removal Instructions

Cup respirator in hand to maintain position on face and pull bottom strap over head. Still holding the respirator in position, pull top strap over head and remove respirator.

NIOSH Approved: N95
At least 95% filtration efficiency against solid and liquid aerosols that do not contain oil.

1. PROTECTION

N95 - Particulate Filter (95% first efficiency level) effective against non-oil based particles. Use at or below 100% of recommended concentration levels.

2. CAUTIONS AND LIMITATIONS

A. Avoid use in atmosphere containing less than 19.5 percent oxygen.
B. Never use in atmosphere immediately dangerous to life or health.
C. Do not exceed maximum use concentrations established by regulatory standards.
D. Failure to properly use and maintain the respirator could result in injury or death.
E. All approved respirators shall be selected, fitted, used and maintained in accordance with OSHA, ANSI and other applicable regulations.
F. Do not alter the respirator, its components, or any part. Use only unaltered replacement parts in the configuration as prescribed by the manufacturer.
G. Follow the user’s instructions, and/or maintenance manuals for information on use and maintenance of these respirators.

NIOSH does not evaluate respirators for use as surgical masks.
This respirator contains no components made from natural rubber latex.
